RO

- 1) Have you tried Shope for restoration of the enzyme to isolated cells in culture of the anarginasiacs? (I would have assumed that you had planned that as a preliminary to clinical trial.)
- 2) Are you using/do you know about ASCA? I should think it would pay off handsomely for you, just under the keys:
Shope Rogers, S. and arginas.
- 3) The preprints herewith may interest you.

Yours,
